

Girl Scouts Graphic Guidelines

Council Servicemark and Acronym Clear Space

Servicemarks

It is imperative that we protect the integrity of our servicemark, which means never crowding it or jamming it in a corner.

A minimum clear space of two Trefoils is required between a council servicemark and any other element on a page.

The clear space for the council servicemark is different than the clear space for the primary servicemark because the council servicemark is generally used at a smaller scale.

Note that this rule defines the space between two elements on a page, not the space to the edge of the page. Reference the Layout section to determine margins.

When centering the council servicemarks, which extend beyond the word “girl scouts,” the full width of the lockup should be used to determine the center.

Acronyms

A minimum clear space of two Trefoils is required between a council acronym and any other element on a page.

Note that this rule defines the space between two elements on a page, not the space to the edge of the page. To determine margins, reference the Layout section.

Council Servicemark and Acronym Minimum Size

Council servicemarks vary in length and height, and for this reason their rules are different than those of the primary servicemark.

The minimum size for council servicemarks is defined by the height of “girl scouts” plus the Trefoil and should never be under 36px digitally or 0.375 inches in print. This applies to servicemarks of any length—one, two, or three lines.

The smallest size for the council servicemark is determined by the height of the Trefoil should never be smaller than 50px digitally or 0.25 inches in print.

Note that the minimum size does not account for product and packaging scenarios.

Council Servicemark and Acronym Color

Council servicemarks and acronyms should be used in our signature two-color lockup: black and green. Text can be used in white when legibility is compromised.

When a single color is required, the council servicemarks and acronyms can be shown in all black or all white.

Please see the Color section to reference the values used for Girl Scout Green.

Note: Product and licensing have specific guidelines that should be referenced.

Color Palette

Girl Scout Green

Green is one of our greatest equities. It should be used prominently in external communications, especially for the Trefoil. Two new shades of green support Girl Scout Green, adding variety, depth, and richness. Always consider the role of green when creating both internal and external communications. Also think about communications for both low awareness and high awareness environments.

Trefoil

The Trefoil is the simplest and most potent expression of our brand. It can be used when communicating with both internal and external audiences.

It may be used alone for communications where the Girl Scout brand has already been established through prominent copy or other clear context. Otherwise, it should be used in combination with the Movement or council servicemarks.

Note: Affiliation gear is a great way to build brand equity in the Trefoil as a stand-alone symbol. In these cases, the wearer serves as the context, becoming a natural ambassador for the brand. Gear can include shirts, hoodies, bags, hats, pins, etc.

Trefoil Clear Space

Clear space defines the distance that should be allowed between the Trefoil and any other graphic element on a surface.

When using the Trefoil at a small scale, use the clear space rule outlined in the first example.

When the Trefoil is used at a large scale, it should adhere to the margin and gutter standards outlined in the Layout section of the Brand Standards rather than the clear space rule.

These examples illustrate the difference between using the Trefoil at a large versus a small scale and its clear space.

These examples illustrate the difference between using the Trefoil at a large versus a small scale and its clear space.

Trefoil Minimum Size

To maintain the integrity of the shape, the Trefoil should never be used smaller than 30px digitally or 0.125 inches in print.

Trefoil Color

Green is our signature color and has been a brand equity since we introduced it in our uniforms in the 1940s, and it became associated with our brand over time. We should leverage this color strategically.

As our official brand color, Girl Scout Green should be used for the Trefoil in formal settings. It should also be used for audiences who are unfamiliar with our brand. Using a consistent color will help to build familiarity and brand recognition.

However, in order to allow for more flexibility within the design system, the Trefoil can also be used as a supporting element using colors from the official palette. This should be reserved for environments where the audience is already familiar with the brand.

Trefoil Don'ts

In order to maintain the power and integrity of the Trefoil, never do the following things:

1. Never use more than one Trefoil in the same application.
2. Never crop it.
3. Never rotate it.
4. Never use it as a pattern (exceptions apply for products and packaging).
5. Never add effects to it.
6. Never outline it.
7. Never wrap text around it or lockup text close to it.
8. Never place it closer to text than the clear space allows.
9. Never use it to replace a typographic character.
10. Note: One Trefoil can be use per surface area. For example, a spread in a booklet or workbook can feature a Trefoil on each page.
11. Never place any text inside of it, including page numbers.
12. Never place the Trefoil next to text.

Cobranding

Partner and Sponsor Cobranding

The Movement servicemark should be used when creating partnership lockups.

While there is no single rule defining the scale relationship of our servicemark to all partner logos, the following examples of various proportions serve as a guide.

The distance between our logo and the partner logo should be one Trefoil, vertically or horizontally. The scale of the logos should achieve an optical balance, not an exact measurement.

The two logos should always be vertically or horizontally centered depending on the orientation.

Use a thin gray line to separate our logo from the partner logo.

If there is prominent placement of the Girl Scout brand name where the partnership lockup appears, the Trefoil alone can be used in place of the servicemark.

Note: These parameters apply to partners and sponsors but are not intended for product and licensing.

Here is a range of examples to show how partnership servicemarks should appear.
